

Swing Bed Program

Helping patients transition from hospital to home.

To provide accessible quality healthcare services to the people of the community and surrounding areas;
To provide the best opportunity for recovery of good health;
To provide competitively priced healthcare services;
To assure the continued viability of the hospital through planning and sound financial management.

Swing Bed/Rehab Program

Russellville Hospital offers excellent swing bed services. Receive quality care and personalized care close to home.

Our rehab services offer:

- Physical Therapy
- Skilled Nursing
- Social Services
- In-house Pharmacy
- Activities
- Dietary services
- **Safety: Fall Prevention Program**

RECOVER FASTER
CLOSER TO HOME

How it Works?

After injury or illness that requires hospitalization, it is sometimes necessary to have skilled nursing care. Our Swing Bed program allows you to **recover faster closer to home** while being cared for by our expert nursing and rehabilitation team in a hospital setting.

Our goal is to make sure you are returned to health so that you can get back to your life quickly while avoiding unnecessarily readmission to the hospital.

What must I do to come to swing bed rehab?
Notify your physician or case manager at the hospital and they may contact us to review your case.
